

The SRM-Bar™ is designed specifically for the 80mm ID target tube used with the CM-Series external mount end block.

**ADVANCED MAGNET SYSTEM FEATURES:**

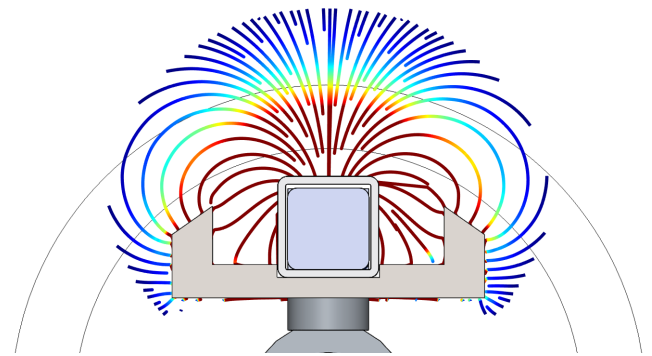

- High strength magnets that are hermetically sealed
- Advanced magnetics designed using 3D finite element analysis software
- Magnets are matched in strength within 1%
- Large magnet, single row design
- Simple magnetic uniformity tuning
- Easily installed in any possible orientation

SRM-Bar™ Magnetics

**BENEFITS:**

- 5-year limited warranty
- Superior target utilization and reduced cross corner effects
- Industry leading magnetic uniformity up to +/- 1%
- Narrow deposition profile minimizes coating loss to shields
- Lengthen your campaigns by decrease downtime and increase productivity
- Adjustable sputter angle when used with our CM-Series external end block

SRM-Bar™ Magnetic Field

Model	Max Target Diameter	Sputter Angle	Target Material Utilization	Application
SRM	115 mm	± 21°	>85%	80mm ID Targets Acceptable for most material

All specifications are for 100mm OD target
